

## Table A – Results of Internal Review Committee

Date of Report: July 6, 2005

Water Body Under Evaluation:

Identification #: 3163  
Name: Dry Hollow (C)  
Length of Segment: 0.5 miles  
County (ies): Lawrence

Use Attainability Analysis Study:

Identification #: 1147  
Submitter: DNR Staff - Campbell and Woodward  
Date Received: July 14, 2005  
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Completeness Check:

All Required Information Included?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Correct Forms Used?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Forms Signed and Dated?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Comments:		

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown  
Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The UAA was conducted in July 2005 and no WBCR was observed. The stream did not have enough depth to meet the WBCR use at the only site evaluated. Since the site is less than 1/2 mile from the mouth and there are no obvious tributaries below it, the committee feels it is representative of the stream and recommends removing the WBCR designation.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
